Re: CapX2020

From: Jeremy Chipp

Citizens Energy Task Force

Phone: 608-317-5700

Dear Stephanie, attached are petitions including signatures from concerns residents from both WI and MN, regarding the CapX2020 project (USDA/RUS).

Enclosed are:

- 1) Six pages of signatures from Wisconsin & Minnesota residents where petitioners signed to the following:
  - a. 1) Say NO to federal tax financing of the La Crosse Capx2020 power line through the USDA/RUS for lack of need, and the avoid environmental and economic loss to the land and people of Trempealeau County
- 2) Four pages of petitions from both WI and MN residents where petitioners signed to:
  - a. 1) Reconsider MN Certificate of Need (CON) for the Capx2020 power lines, including the La Crosse line.
  - b. 2) Say NO to federal tax financing of the La Crosse CapX2020 power line.

Thank you for including this in your review of the USDA/RUS EIS Process.

We firmly believe that the USDA/RUS should consider the "NO BUILD" option for CapX2020.

Thank you,

Jeremy Chipp

**N-005-001**

Your comment has been noted. The Draft Environmental Impact Statement will be available on the RUS website at: <http://www.usda.gov/rus/water/ees/eis.htm>. Comments on the Draft Environmental Impact Statement will be solicited after its publication.

# (2020 High Voltage Power Line Project

other utilities (CapX2020) are proposing 345kV high voltage power lines from Minneapolis to the Mississippi River either at Alma, WI, Winona MN or La Crosse. Large 150-ies would have a major impact on scenic beauty property values, natural habitats and health (AFS). CapX2020 power lines could also permit dirty coal power from North Dakota to be East, where the power can be sold for the utilities profit to large markets like Chicago. on April 16, 2009 didn't consider new evidence of the reduction in electric demand or t would cause less environmental harm to the Upper Mississippi River National Wildlife Refuge could be funded by increased rates. Dairyland Power is also asking for our federal tax money SDA/RUS) to pay its costs for the La Crosse power line. Visit: [www.cetf.us](http://www.cetf.us)

**Need (CON) for the CapX2020 power lines, including the La Crosse line;**

N-005 CETF Petition  
Appendix I

Petition: Oppose CapX2020 High Voltage Power Line Project

Petition summary and background	Xcel Energy, Dairyland power and 9 other utilities (CapX2020) are proposing 345kV high voltage power lines from Minneapolis to La Crosse. Proposed lines would cross the Mississippi River either at Alma, WI, Winona MN or La Crosse/La Crosse. Large 150-170 foot (15 stories) power lines & poles would have a major impact on scenic beauty property values, natural habitats and health risks from electro-magnetic fields (EMF'S). CapX2020 power lines could also permit dirty coal power from North Dakota to be transmitted across MN & WI to points East, where the power can be sold for the utilities profit to large markets like Chicago. Certificate of Need (CON) approved on April 16, 2009 didn't consider new evidence of the reduction in electric demand and alternatives to the La Crosse line that would cause less environmental harm to the Upper Mississippi River National Wildlife Refuge and other natural resources. Lines would be funded by increased rates. Dairyland Power is also asking for our federal tax money through the Rural Utilities Service (USDA/RUS) to pay its costs for the La Crosse power line. Visit: <a href="http://www.cetf.us">www.cetf.us</a>
Actions petitioned for:	1) Reconsider MN Certificate of Need (CON) for the CapX2020 power lines, including the La Crosse line; 2) Say NO to federal tax financing of the La Crosse CapX2020 power line.

Date: \* 3) Join Citizens Energy Task Force- it's free. Add your email address for updates. CETF is working with Miss. River Revival to fight CapX2020 lines.

Petition summary and background	Xcel Energy, Dairyland power and 9 other utilities (CapX2020) are proposing 345kV high voltage power lines from Minneapolis to La Crosse. Proposed lines would cross the Mississippi River either at Alma, WI, Winona MN or La Crosse/La Crosse. Large 150-170 foot (15 stories) power lines & poles would have a major impact on scenic beauty, property values, natural habitats and health risks from electro-magnetic fields (EMF's). CapX2020 power lines could permit dirty coal power from North Dakota to be transmitted across MN & WI to points East, where the power can be sold to lucrative markets like Chicago. Proposed Transmission line corridors down either side of the Mississippi River have met with stiff opposition, resulting in several routes through Trempealeau County that are becoming the preferred alternative. Though this power is not for our use, we are being asked to pay higher electricity rates and to abandon our lands and risk our health so that urban areas can have unlimited, inexpensive and reliable power. Dairyland Power is also asking for our federal tax money through the Rural Utilities Service (USDA/RUS) to pay its costs for the La Crosse power line. We hereby petition the RUS to deny funding for this project which is for us an economic and environmental disaster. Locally, our power consumption is declining, not increasing and efforts to incorporate renewable energy should perpetuate this trend.
Actions petitioned for:	1) Say NO to federal tax financing of the La Crosse CapX2020 power line through the USDA/RUS for lack of need, and to avoid environmental and economic losses to the lands and people of Trempealeau County!
